

## Stewart Smart – VHMC Director Bio

I started my career as a Scientific Officer at what was the Royal Aircraft Establishment in Farnborough, followed by many years in software design, implementation and consultancy for a software company, including time as Quality Manager for its Defence Division. I was also an internationally Registered Lead Auditor for an Accredited international Quality Management Systems Certification company. I ended my career as Quality Manager and OFCOM Billing Accuracy Program Manager for Vodafone UK, followed by time as an independent Billing Accuracy Consultant to Vodafone, helping them to achieve further OFCOM Approval for billing accuracy.

My wife and I bought an apartment on Winterthur Way in 2015 and I joined the VHMC Board as a Director in 2016, with a view to helping ensure that budgets are set correctly and that expenditure is in keeping with maintaining the estate to an acceptable level without incurring excessive costs to Leaseholders. I am also passionate about ethical standards of behaviour and business practice.
